About Me

I am a self-taught programmer with a background in small business and 8+ years of diverse experience. I collaborated closely with a small team, solving problems and taking initiative to meet all their IT needs, which led me to a deep interest in coding first as a hobby and eventually as a calling. I am friendly and passionate, inventive and detail-focused, always oriented towards learning and growth.

Background and experience

Scrum master - LearnIT training program

BearIT (Finland)

April 2023 - now

- Mastering full-stack development (React, Node, Next.js)
- Exploring the possibilities of AI, its integrations and the ways it transforms work and living
- Creating an AI-assisted gardening app aimed at accessibility and smart guidance
- Employing Agile methodologies, Scrum, industry practices and principles
- Learning and building together as a diverse team

IT specialist

Raznocvetje Gardening Shop & Nursery (Russia)

May 2014 - July 2016, then January 2018 - February 2022

- Developed a plant stock and production tracking system with a cloud database, created a user interface for it, instructed coworkers on using it to gather and evaluate plant data
- Initiated, planned and oversaw the adoption of a cloud-based sales and inventory platform, deployed it, built API integrations for it and trained team members in its use
- Developed automations for printing and integrated them with the inventory software
- Built and maintained company website
- Sought out feedback from coworkers, anticipated arising needs and challenges, took the lead in planning IT development
- Wide-ranging problem-solving and troubleshooting, research and writing

Customer service and technical support

TwoSigmas (UK)

September 2016 - September 2017

- Instructed customers in using software and provided technical support
- Edited instruction materials and website content, provided design feedback
- Collaborated with coworkers to resolve issues and improve processes

Skills and competencies

- **Javascript**, React, Node, Express, Next.js, MongoDB, OpenAI
- HTML/CSS, Google services, VSCode, Git, Linux
- Communication, collaboration, listening, writing, teamwork, flexibility, initiative, continuous learning
- Fluent English, native Russian, actively learning Finnish
