

# Elena Aseeva

## Frontend developer

Friendly and passionate web developer, with good social and teamwork skills. I have quite a few websites and web applications under my belt. Familiar with HTML, CSS, Tailwind, JavaScript, React, Gatsby, Next.Js, Wordpress, fluent in Finnish and English in practical situations. I have excellent interpersonal skills and get along easily with different types of people, I'm not afraid of new challenges and I'm a fast learner. During the last project I have realised that the ability to lead is one of my strong points.
