Tech Stack

As a new trainee learning to be a software developer, I'm getting really good at using the latest tools and technologies.

I started with almost no knowledge, but within just a month, I was able to build a working web app from scratch. It's pretty cool how much progress I've made so far!

My evolving tech stack includes:

Frontend:

- JavaScript
- React js
- NEXT.js
- HTML
- CSS
- Tailwind CSS

Backend:

- Prisma
- MongoDB
- OpenAPI specifications
- PHP

Other Tools:

- Swagger
- Three js
- Three fiber

Summary

I'm a highly skilled interactive media designer with a unique professional journey. My background in architecture, alongside my ongoing studies in 360-degree, VR/AR, and UX/UI, has shaped me into a well-rounded generalist. While these form the core of my skills and expertise, I am equally capable of assuming responsibilities and providing assistance whenever required.

Currently, I'm enhancing my skills through software development training at BearIT OY. This will enable me to create even more dynamic digital experiences.

My creativity and innovative problem-solving abilities set me apart. With my expertise, I'm confident in assisting your company to create groundbreaking interactive media that leaves a lasting impression on customers.

Latest Project

A Smart App for plants care.

Ongoing Education

Software Development training

Experience

2010 - Current
Finland

Interactive media designer

Throughout my recent experiences, I have focused on personal projects and freelance engagements encompassing diverse areas such as 3D/360 architectural visualization, virtual tours for real estate, web design, and product visualizations. These ventures have significantly enriched my expertise and provided insights into cutting-edge technologies and trends, propelling me to continuously enhance my capabilities.

Some highlights of my accomplishments include:

- Developing a comprehensive visual identity for a startup, encompassing a fully-fledged website, logo design, printable assets, and an immersive 360 VR experience showcasing the company's product. This endeavor contributed to the company's recognition, leading to its prestigious win of the GIFA Best Invention of the Year award. Furthermore, the company received commendation Email from President **Sauli Niinistö** office, further emphasizing the impact of the project.
- Crafting an interactive walk-through for the **UAE Ministry of Investment's** new headquarters in the Abu Dhabi. This project showcased my ability to seamlessly merge creativity and functionality to deliver a compelling user experience.

In addition to these accomplishments, I have undertaken various personal practice projects, including the creation of 3D renderings for interior and architectural spaces, and an interactive sales application tailored for real estate purposes.

2001 - 2010
Egypt - Oman - Kuwait - UAE

Architect

In my previous roles in architecture, I developed a range of skills that are highly relevant to software development, including collaboration, teamwork, problem-solving, critical thinking, and project management expertise.
